

## Assignment -4 Docker and Kubernetes

Student Name	SNEHA S
Student Roll Number	130719205044
Maximum Marks	2 Marks

### 1. Pull an image from docker hub and run it in docker Playground

The screenshot shows a web browser window displaying the Docker Hub page for the repository `uifd/ui-for-docker`. The page header includes the Docker Hub logo, a search bar with the text `uifd/ui-for-docker`, and navigation links for Explore, Repositories, Organizations, and Help. The repository page shows the repository name `uifd/ui-for-docker` with a star icon, indicating it is a public repository. Below the name, it says "By uifd • Updated 6 years ago". A description states: "A web interface for Docker, formerly known as DockerUI. Deprecated, use Portainer for new features." There are tabs for "Other" and "Image". The "Overview" tab is selected, showing a message: "This repo is deprecated. Development continues at: [portainer/portainer](#)". Below this, there is a link to "chat" and "see gitlog". A description of the repository is provided: "UI For Docker is a web interface for the Docker Remote API. The goal is to provide a pure client side implementation so it is effortless to connect and manage docker." On the right side, there is a section titled "Docker Pull Command" with a code block containing the command: `docker pull uifd/ui-for-docker`. The browser's address bar shows the URL `hub.docker.com/r/uifd/ui-for-docker`. The Windows taskbar at the bottom shows the search bar, task view button, and several application icons, including File Explorer, Edge, and Docker Desktop. The system tray shows the date and time as 8:38 PM on 10/25/2022.

## Aboutus

### Mission

SMARTBRIDGE is an edTech organization with a vision to bridge the gap between academia & industry. Our outcome-based experiential learning programs on emerging technologies (Internet of Things, Machine Learning, Data Science, Artificial Intelligence, Robotics) are building skilled entry - level engineers, for the corporate world. .

### Vission

Our main objective is to bridge the existing gaps between prevailing industry standards and what the academics offer to the graduates while passing out of university. SmartBridge offers suitable skill deployment and training to the young talent before on boarding their first job. Our skill development programs are designed considering the present expectations in the industry.

### Objective

Well directed career guidance programs for educational institutions  
Appropriate certification courses that suit the industry need  
Train the trainers; expanded awareness about the current industry standards  
Liaise with corporates to offer niche internships  
Establish technology development centers in colleges  
Specialised incubation centers in collaboration with corporates
